EDUCATION	<b>University of Waterloo, Canada (UW)</b> <i>Sept 2019-Present</i> <i>Degree</i> Master of Mathematics in CS (thesis) <i>GPA</i> 97/100 (4.0/4.0) <i>Supervisor</i> <a href="#">Prof. Ming Li</a> <i>Coursework</i> Optimization for Data Science, Machine Learning, Deep Learning for NLP and Information Retrieval <i>Teaching Assistant</i> CS 115, Introduction to Computer Science (Fall 2019) <b>International Institute of Information Technology, Bangalore (IIIT-B)</b> <i>Aug 2014-July 2019</i> <i>Degree</i> Integrated Masters in Information Technology <i>CGPA</i> Overall: 3.32/4, Theoretical CS Major: 3.63/4 <i>Coursework</i> Advanced Machine Perception, Data Structures and Algorithms, Linear Algebra <i>Teaching Assistant</i> CS 302, Theory of Automata and Computations (Fall 2018) SP 825, Visual Recognition (Spring 2019)
INTERESTS	Machine Learning for Recommender Systems, NLP and Computer Vision
PUBLICATIONS	<b>Anup Deshmukh, Pratheeksha Nair, Shrisha Rao, “A Scalable Clustering Algorithm for Serendipity in Recommender Systems,”</b> <i>ICDM 2018 workshop - SAREC [Paper] [Code]</i> <ul style="list-style-type: none"><li>Effectuated serendipity in movie recommender systems with an algorithm - Serendipitous Clustering for Collaborative Filtering (SC-CF) that also efficiently tackles the problem of high sparsity.</li></ul> <b>Rameshwar Pratap, Anup Deshmukh, Pratheeksha Nair, Tarun Dutt, “Fast and Provable Concept Decompositions in Large Text Corpus,”</b> <i>ACML 2018 conference [Paper] [Code]</i> <ul style="list-style-type: none"><li>Proposed an algorithm by considering the spherical clustering problem for large sparse document collections. Proved that, with our approach the computational complexity in SPKM++ can be decreased while retaining the <math>\mathcal{O}(\log k)</math> approximation guarantee to the optimal clustering result.</li></ul>
PROJECTS	<b>ContentNCF: Content Based Neural Collaborative Filtering</b> <i>August 2019-Present</i> <i>Course: Machine Learning at UW</i> <i>Guide: Prof. Yaoling Yu</i> <ul style="list-style-type: none"><li>Extended Neural Collaborative Filtering (NCF), to content-based recommendation scenarios and presented a CNN based collaborative filtering approach tailored to image recommendation.</li><li>ContentNCF with the best parameter setting achieves HR and NDCG of 0.940 and 0.582 resp for the task of top-K recommendation.</li></ul> <b>A Generative Adversarial Network for Diversity in Recommender Systems</b> <i>July 2019</i> <i>Masters Thesis: Multimodal perception lab at IIIT-B</i> <i>Guide: Prof. Dinesh Babu</i> <ul style="list-style-type: none"><li>Proposed a Generative Adversarial Network (GAN) which exploits Reinforcement Learning (RL) to give diverse yet relevant recommendations. Achieved 77% of intra-list diversity in recommendations.</li></ul> <b>Scaling up Simhash</b> <i>(Under review in top AI conference)</i> <i>Jan 2018-Aug 2018</i> <i>Independant work at IIIT-B</i> <i>Guide: Prof. R. Pratap</i> <ul style="list-style-type: none"><li>Proposed a dimensionality reduction sketching algorithm - simsketch - which maintains an estimate of the cosine similarity between original real valued vectors.</li><li>In the task of all-pair-similarity search we show that Simsketch significantly outperforms Simhash for higher threshold values on the precision-recall measure.</li></ul> <b>Merge LSTM model for Image Description Generation</b> <i>August 2017-April 2018</i> <i>Course: Research Elective at IIIT-B</i> <i>Guide: Prof. Dinesh Babu</i> <ul style="list-style-type: none"><li>Built the deep model using Keras on the construction which uses both LSTMs for language modelling and CNNs for generating image representation. Achieved BLEU score of 0.51.</li></ul>
WORK EXPERIENCE	<b>FAST lab, CentraleSupélec - France</b> <i>May 2018-Oct 2018</i> <i>Internship: Perception of Emotions from Audio Signals</i> <i>Guide: Prof. Renaud Seghier</i> <ul style="list-style-type: none"><li>Analyzed different set of acoustic features which are designed to detect the perceptual content of audio with CNNs in focus. Proposed Emo-CNN achieved 90.20% of categorical accuracy.</li></ul> <b>SlicePAY, Bangalore - India</b> <i>May 2016-July 2016</i> <i>Internship: Full Stack Development</i> <ul style="list-style-type: none"><li>Led the task of bringing flexibility in payment by building a browser extension using JavaScript which gave access to the SlicePAY's payment plans right from user's merchant website.</li></ul>
SKILLS	<i>Languages</i> Python, C++, JScript <i>Tools</i> Keras, TensorFlow, Matlab, Latex
OTHER ACTIVITIES	2017 Speaker, TEDx pre-event at IIIT-B; Co-Founder, 'Comic Club' at IIIT-B 2016 Winner of the Hackathon held in IIIT-B as part of the Signal Processing course 2016 Designed and created an Intellectual Property Management Portal for IIIT-B. 2014 Top 1% in Maharashtra State's Higher Secondary School Certificate (HSC) exam
